

Don't water down Wisconsin's No Call List law - adopt it nationwide and permanently. It has been a blessing - for over two years now I have not been harrassed and bothered by unwanted telemarketing calls. The first, last and only time I ever bought from a telemarketer, I was cheated out of \$750 and the government did nothing to help me get my money back - this company legally, I guess, got away with stealing my money. Why should they be allowed to call people? Who needs protecting here? How about if all those proponents of the softer law get my \$750 back for me!
